Dear Dan and Irene:

Community Mental Health Children's Services for Children with Developmental Disabilities thanks you for your contribution to the teen group workshop held on February 17, 1996. Your presentation was very creative and well organized.

Your ability to keep the students focused was most impressive. The communication and warm-up activities were especially effective in helping the students express their emotions and stretch their imagination.

The students were very pleased with the exercises that took place throughout the day, and in particular, having the opportunity to create their own script and play.

Again, we thank you and look forward to working with you in the future as opportunities arise.

Sincerely,

Carol Igoe / *Judy Thompson* / *Vanessa Thrash*
